

# Delivering Self-Service Data at AI Scale on Databricks

Even with the power of your Lakehouse, data teams struggle to keep up with growing demands for ad hoc self-service analytics. AI agents and business users need answers in minutes — not weeks. Promethium delivers instant, contextual Data Answers directly from Databricks and across your entire data landscape.

## Get Instant Data Answers From Your Lakehouse — Today

Promethium makes it possible to **go from business question to answers in minutes**. At the core: dynamic, contextual Data Answers.

Collaborative **question & answer agent** for instant data answers

Trusted results powered by **rich technical and business context**

Real-time access to **Databricks and all your distributed data** with an Instant Data Fabric

Data answers are dynamically generated data sets that can be consumed by BI tools, surfaced in marketplaces, or pushed into **agentic workflows via MCP** – to meet the business with what they need where they are and without delays.

## Unlock the Full Potential of Your Lakehouse With Instant Data Answers

### Extend Databricks's Reach

Analyze data across your ecosystem and return results to Databricks

### Enable Self-Service Data

Empower business teams and AI agents to get the answers they need

### Enrich Genie with Context

Make Databricks smarter by integrating metadata across systems

### Explore First, Then Operationalize

Rapidly iterate and test hypothesis, then persist trusted outputs back to Databricks

### Maximize Your Databricks ROI

Unlock new use cases, increase adoption, and support real-time decision-making at scale
