# Promethium

Delivering Self-Service Data at AI Scale on Snowflake

Even with the power of Snowflake, data teams struggle to keep up with growing demands for ad hoc- self-service analytics. AI agents and business users need answers in minutes — not weeks. Promethium delivers instant, contextual Data Answers directly from Snowflake and across your entire data landscape.

Get Instant Data Answers From Snowflake — Today

Business Apps | BI Tools | APIs / Agents

Promethium Platform
- Data Answer Agent
- 360° Context Engine
- Instant Data Fabric

Data Sources (On Premise, Cloud, Hybrid)
Data Lakes | Data Warehouses | Relational Databases | Applications

Promethium makes it possible to **go from business question to answers in minutes**. At the core: dynamic, contextual Data Answers.

- Collaborative **question & answer agent** for instant data answers
- Trusted results powered by **rich technical and business context**
- Real-time access to **Snowflake and all your distributed data** with an **Instant Data Fabric**

Data answers are dynamically generated data sets that can be consumed by BI tools, surfaced in marketplaces, or pushed into agentic workflows via MCP – to meet the business with what they need where they are and without delays.

Unlock the Full Potential of Snowflake With Instant Data Answers

Extend Snowflake's Reach
Analyze data across your ecosystem and return results to Snowflake

Enable Self-Service Data
Empower business teams and AI agents to get the answers they need

Enrich Cortex with Context
Make Snowflake Cortex smarter by integrating metadata across systems

Explore First, Then Operationalize
Rapidly iterate and test hypothesis, then persist trusted outputs back to Snowflake

Maximize Your Snowflake ROI
Unlock new use cases, increase adoption, and support real-time decision-making at scale
